SUSTAINABILITY POLICY

The purpose of this Policy is to define the sustainability approach of Türk Prysmian Kablo ve Sistemleri A.Ş. and to ensure that this approach is integrated into all business processes. The Company adopts sustainability as a fundamental element of its business strategy and conducts its activities with a long-term value creation perspective.

This Policy covers all operations of Türk Prysmian Kablo and applies to all employees, suppliers, business partners, and all parties acting on behalf of the Company. The Company expects all stakeholders to act in accordance with this Policy.

Türk Prysmian Kablo conducts its activities in alignment with Prysmian's sustainability approach and considers sustainability an integral part of its corporate governance framework. The Company adopts an ethical, responsible, and transparent approach across all business activities and is committed to full compliance with applicable legal requirements and internal regulations. It systematically identifies risks and manages them effectively.

The Company bases its product and technology development processes on the principles of quality, safety, and innovation, and aims to provide solutions that contribute to the sustainable development of energy and telecommunications infrastructures, facilitate the energy transition, and promote energy affordability and energy security. Türk Prysmian Kablo prioritizes reducing the environmental impact of its products and developing more efficient, reliable, and sustainable solutions.

As part of its commitment to social responsibility, Türk Prysmian Kablo respects the rights of its employees and provides a safe, inclusive, and fair working environment. The Company supports employee development, promotes the principles of diversity and equal opportunity, and values contributing to the communities in which it operates.

Within the scope of environmental responsibility, Türk Prysmian Kablo prioritizes reducing the environmental impacts arising from its activities and ensuring the efficient use of natural resources. The Company undertakes initiatives to optimize energy consumption, reduce greenhouse gas emissions by pursuing its net zero ambition, and continuously improve

waste and water management practices, thereby contributing to the fight against climate change.

Türk Prysmian Kablo regularly monitors, measures, and evaluates its sustainability performance. The Company improves its performance in line with established objectives and reports relevant processes in accordance with applicable standards. Its sustainability approach is integrated into all business processes and implemented with a commitment to continuous improvement.

Management functions are responsible for the implementation of this Policy. All employees are required to act in accordance with the principles of this Policy within the scope of their duties and responsibilities. Türk Prysmian Kablo also encourages its business partners and suppliers to comply with these principles.

Türk Prysmian Kablo regularly reviews its sustainability performance and takes actions to drive continuous improvement. This Policy shall be updated when necessary, in response to changing conditions and stakeholder expectations.
